

## Short Course on Supply Chain and Logistics Management

### Overview of the course

The **NELSON MANDELA AFRICAN INSTITUTION OF SCIENCE AND TECHNOLOGY** has partnered with **TIMELESS BUSINESS SOLUTION** to offer a short course in **Supply Chain and Logistics Management**.

Supply chain management is important for the performance of the organization. It enables the organization to make sure that all required materials and supplies needed for operation are available on time. Also, it enables to make sure that, inventory is procured on time, well stored and managed to make it immediately available for operations or supply to customers. This course will expose participants to current trends and best practices in Supply Chain and Logistics Management. The participants will learn more about the whole chain process starting including sourcing, production and service delivery.

### Course main objectives

- Manage supply chain to attain competitive advantage
- Create an inventory strategy that controls costs
- Evaluate and work with suppliers to deliver tangible positive results
- Enhance organization efficiency and effectiveness through supply chain and logistics management

**Targeted to:** Senior Supply Chain Managers and Executives, Junior Supply Chain Executives, Manufacturing Managers, Marketing Managers, Project Managers & Operations Managers etc. Individuals willing to create value in an organization through supply chain management.
